

EPPCO FLUSH OIL

PRODUCT DESCRIPTION

EPPCO FLUSH Oil is manufactured from high quality light viscosity paraffin oil, designed for the efficient EN-FLUSH of automotive equipment to remove residues prior to refilling with new engine lubricant.

APPLICATIONS

EPPCO FLUSH OIL has been developed for the use in the flushing of lubricating systems of automotive gasoline and diesel engines. It cleans the crankcase, cylinder walls, pistons and rings for maximum efficiency, protection and performance. This is done while the engine is idling so that there is less stress on the engine while the cleaning action occurs.

RECOMMENDATIONS

- ◆ **EPPCO FLUSH OIL.** Once the **EPPCO FLUSH** oil has been filled into the engine system, it should be circulated for only a short time under light or no load conditions. At the end of the **FLUSH** period, make sure the oil is drained while it is still hot.

KEY BENEFITS

EPPCO FLUSH provides:

- **Improve oil flow for better performance.**
- **Reduce risk of clogged oil galleries & ports**
- **Reduce chance oil consumption due to contaminated oil**
